MADE  
IN ITALY  
MADE BY  
UNIVET

The shapes and high-end materials that we use are defined by the Italian manufacturing tradition and they enrich all of our products, so that they become not only a tool, but a testimony of Italian craftsmanship excellence.

*Linee e materiali pregiati delineano lo stile della tradizione manifatturiera italiana arricchendo ogni modello per renderlo, non solo uno strumento di lavoro, ma anche un testimone dell'eccellenza artigianale Italiana.*

# DESIGN

# Our vision

Since 1997 Univet has become an ambassador of style, quality and luxury, typical of the Italian fashion and design world. In the years we have created iconic shapes through which we distinguished ourselves, while we reconceived the idea of professional eyewear.

*Dal 1997 Univet è ambasciatore di stile, qualità e lusso, tipici del mondo della moda e del design italiano. Negli anni ha creato forme iconiche attraverso le quali distinguersi, reinterpretando l'occhiale professionale.*

# LOUPES

# Frames

## PERFECT BALANCE

In a magnifying system, the weight distribution it's one of the most important specs. Univet designs and creates frames, with an evenly distributed weight, that wraps in the most efficient way around the user's head, this means enhanced comfort even during prolonged use.

*In un sistema ingrandente, la distribuzione del peso è una delle specifiche più importanti. Univet progetta e crea montature con un peso distribuito in modo ottimale intorno alla testa, questo si traduce in un maggiore comfort anche durante un uso prolungato.*

# Optics

## THE HEART OF LOUPES

The optical elements are the backbone of the Loupes system and are the secret ingredient of its high performance. Our R&D department in the past years has developed always lighter and sharper binoculars that today are a distinct feature of every Univet loupes.

*Gli elementi ottici sono il cuore del sistema ingrandente e sono l'ingrediente segreto delle sue performance. Il nostro reparto di Ricerca e Sviluppo ha implementato negli anni sistemi sempre più leggeri e precisi che sono oggi l'elemento distintivo di ogni loupes Univet.*

# System

## TAILOR MADE

Our loupes system is the union of two distinct elements in perfect harmony, where the frame design merges with the outstanding optical technology of our binoculars. This process makes each loupes system a one-off, precisely tailored based on the user physiognomy and his professional needs.

*Il nostro sistema è l'unione tra 2 elementi in una perfetta coesione, dove il design del frame si unisce alla massima tecnologia ottica ingrandente. Questa fase rende il sistema loupes unico al mondo perché realizzato sulla tua esatta fisionomia e in base alle tue esigenze professionali.*

# Loupes

BECOME ONE WITH YOURSELF

The Univet loupes will become one with yourself to give you performance and comfort like never before.

*Il loupes Univet diverrà un tutt'uno con te stesso per darti performance e comfort come mai avevi provato prima.*

# ONE

The ONE and only! Unique in its lightness, robustness, distinguished by the refined and stylish Univet design. ONE is engineered to work harmoniously and supplemented with a new adjustable band and a removable gasket to ensure maximum eye protection.

*Un occhiale Loupes unico in leggerezza e resistenza, distinguibile nel tradizionale e raffinato design Univet. ONE coadiuva in armoniosa efficacia tutte le attività dedicate, oltre a poter essere integrato con una banda regolabile di serie e una guarnizione removibile per assicurare la massima protezione degli occhi.*

ONE brings out new glamour with additional design features. The two versions, Desert Sage and Black Edition, have a plate in Desert Sage colour, which can be personalised and optionally selectable from a set of three different interchangeable colours: gold, red or wisteria.

*ONE incrementa il suo aspetto glamour grazie a ulteriori caratterizzazioni estetiche. Le due versioni, Desert Sage e Black Edition, dispongono di una placchetta color Desert Sage personalizzabile nel nome e selezionabile, come optional, in altre tre diverse colorazioni intercambiabili: oro, rosso, glicine.*

## Look & Cool

The Look & Cool are faithful to the unmistakable Univet style: the hand varnished nylon and a metal inserts make each piece light and precious. The eyewear becomes stylish, for both men and women, an item to appreciate, because it's comfortable, functional and made out of quality materials.

*Look & Cool interpretano l'inconfondibile stile Univet: il nylon verniciato a mano e gli inserti in metallo rendono ogni pezzo leggero e prezioso. L'occhiale diviene elegante, sia per l'uomo che per la donna, uno strumento da sfoggiare, comodo, funzionale e di altissimo pregio.*

# TECHNE

The adaptive nature of its sporty and enveloping lines, together with an innovative shape and an outstanding lightness will provide you the best comfort. In fact these glasses have an adapting fitting which improves the performance. Also available in the Techne RX version, a special frame designed for people who need prescription lenses.

*La dinamicità delle linee avvolgenti e sportive, unitamente alla forma innovativa ed un'estrema leggerezza, sono garanzia di comfort assoluto. Gli occhiali di questa linea hanno infatti un adattamento al viso e un peso ridotto che migliora le performance. Disponibile anche nella versione Techne RX, un progetto ottico speciale studiato per persone che necessitano di lenti correttive.*

# Increased robustness

The latest improvement regarding the XP21 material renews the TECHNE line, now contemporary and stronger than ever. This organic thermoplastic polymer, used also in the aerospace industry as a suitable metal alloy replacement, an innovative step forward has been taken for higher chemical and mechanical stress, more resistance to most commonly used disinfectants.

*Da oggi l'impiego del polimero XP21 rinnova tutta la serie TECHNE, rendendola ancor più moderna e resistente che mai. Questo polimero termoplastico organico, usato nell'industria aerospaziale in sostituzione alle leghe metalliche, è in grado di resistere a maggiori stress chimici e meccanici, fino ad aumentare la resistenza a usura e ai comuni disinfettanti in commercio.*

# BLUE LIGHT compliance

All Univet headlight solutions are tested for the danger of photobiological impact from prolonged exposure to blue light emitted by the LED source. These measurements are performed in accordance with the international standard IEC 62471:2006 which specifies exposure limits without adverse health effects.

*Tutte le soluzioni headlight Univet sono sottoposte a test per il pericolo d'impatto fotobiologico da esposizione prolungata alla luce blu emessa dalla sorgente LED. Queste misurazioni sono eseguite in conformità alla norma internazionale IEC 62471:2006 che specifica i limiti di esposizione senza effetti negativi per la salute.*
