

Discover the balance of the full

SPECTRA

powered by  SphereTEC®
Filler Technology

The Ceram.x Spectra™ ST composite family adapts to the way you want to work and provides the right balance of handling, viscosities, and shades. It's exactly what you need and nothing more. **You'll love the simplicity of Ceram.x Spectra™ ST.**

A full composite family that adapts to your working style

FIND BALANCE IN YOUR PROCEDURE

The Ceram.x Spectra™ ST composite family has you covered across all cavity classes, in both anterior and posterior restorations.

Ceram.x Spectra™ ST Universal composite restorative

Experience optimized handling in your preferred viscosity with 5 universal CLOUD™ shades that cover the full VITA® range - with additional options for bleach white, opaque dentin, and translucent enamel.

Ceram.x Spectra™ ST Effects
is layered with Ceram.x Spectra™ ST in anterior restorations for additional opacity and translucency.

Ceram.x Spectra™ ST
is your go-to composite for Class I-V and many other direct and indirect restorative procedures.

Ceram.x Spectra™ ST
works across most cavity classes. We recommend it for Class V restorations and minor repairs.

COVERAGE FOR VIRTUALLY EVERY CASE

74% of dentists complain about the handling properties of composites.¹

Discover your preferred handling

Not all composites are created equal. Ceram.x Spectra™ ST's proprietary SphereTEC® Filler Technology enables excellent adaptation and handling, with options that work the way you want.

- Doesn't stick to hand instrument
- Adapts easily to cavity surfaces
- Easy to sculpt and shape
- Excellent slump resistance

High Viscosity (HV)

Firm + Packable

Low Viscosity (LV)

Creamy + Spreadable

Flowable

Flows on Demand

Ceram.x Spectra™ ST flow Flowable composite restorative

Versatile flow-on-demand handling with shades that perfectly match Ceram.x Spectra™ ST universal CLOUD™ shades.

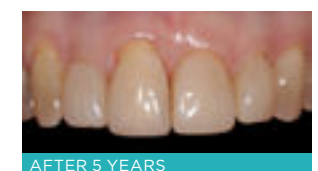

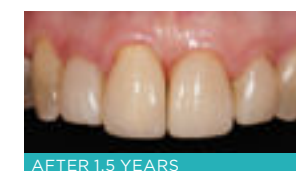

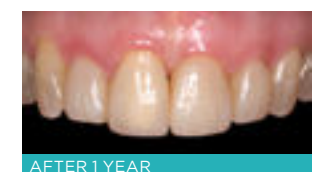

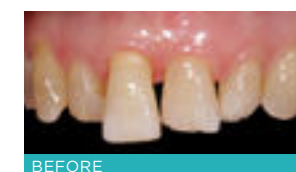

70% of restorative dentistry can be attributed to replacements of failed restorations.⁶

Discover restorations that last

Trust the Ceram.x Spectra™ ST family with your practice's most valuable metric: happy patients.

Discover simplified shade matching

Become the ultimate matchmaker and save time with Ceram.x Spectra™ ST's advanced blending capability known as the chameleon effect. One universal CLOUD™ shade is all you need for the majority of cases.

- Five universal CLOUD™ shades cover the full VITA® range
- Start with A2 shade for posterior and most common cases
- Opaque dentin, translucent enamel, and bleach white shades are available when you need them
- Easier and faster shade selection with less inventory to maintain

FROM SINGLE SHADE RESTORATIONS TO HIGHLY ESTHETIC CASES, YOU'LL LOVE THE SIMPLICITY OF CERAM.X SPECTRA™ ST

It's exactly what you need and nothing more

1 Start with Ceram.x Spectra™ ST in A2 shade for posterior restorations, and your most common cases.

Easily match **80%** of cases with a chameleon effect that's far more natural than single-shade universal composites.⁷

Natural teeth filled with Ceram.x Spectra™ ST A2 shade.
A2 is recommended for single shade restorations.

2 For lighter or darker teeth, choose from additional CLOUD™ shades, and bleach white option.
